Build your curriculum

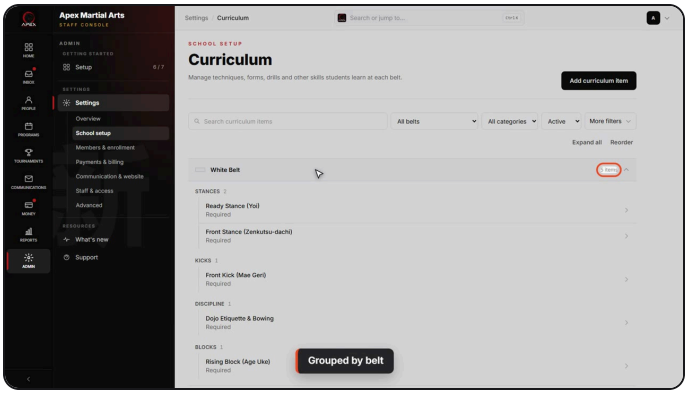

Add the techniques students learn at each belt, mark the ones they must know, and attach videos and handouts.

20 steps

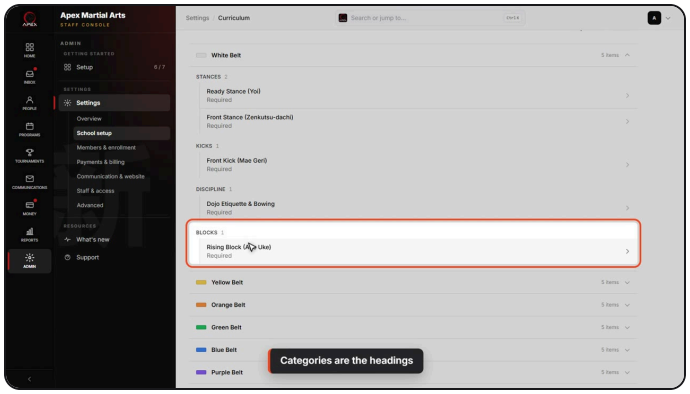

1 Admin, Settings, School setup

You'll find your curriculum under Admin, then Settings, then School setup, then Curriculum. Every technique, form and bit of etiquette lives here.

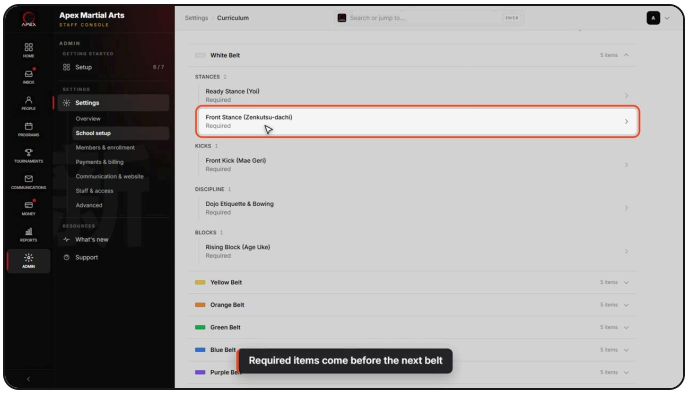

2 Grouped by belt

Items are grouped by the belt they belong to, and each group shows how many items it holds. Click a belt to open or close it.

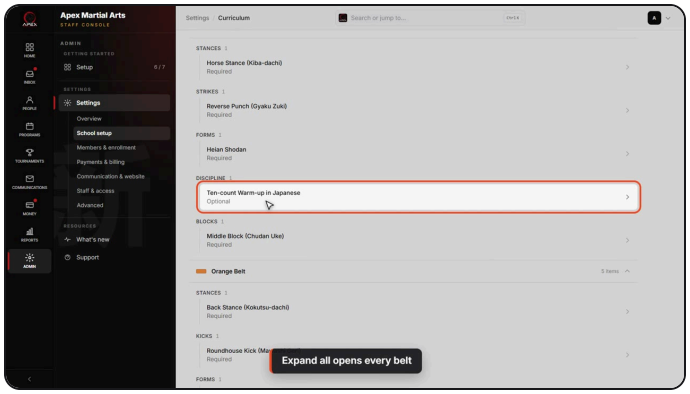

3 Categories are the headings

Inside a belt, items sit under their category, like stances, kicks or blocks, so a long list stays easy to scan.

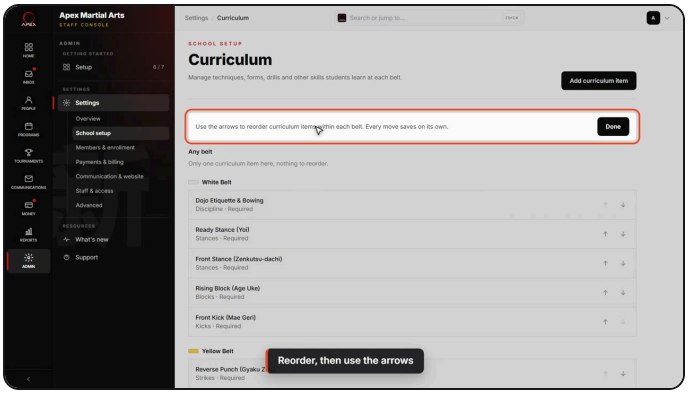

4 Required items come before the next belt

Under each item it says Required or Optional. Required items must be done before a student can move on from that belt and show up as ready to test.

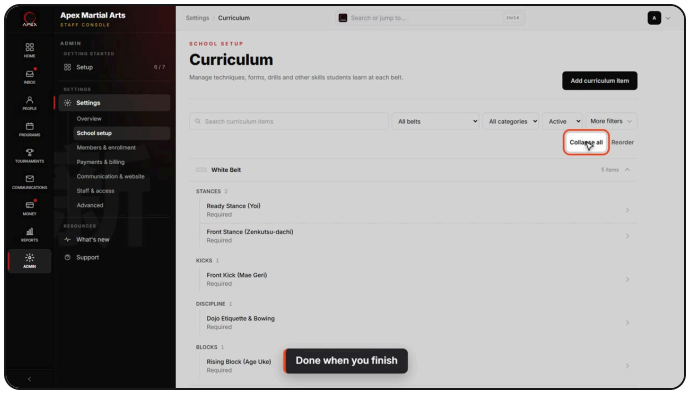

5 Expand all opens every belt

Expand all opens every belt at once. Here's an optional item at yellow belt. Optional items are still tracked, they just don't hold anyone back.

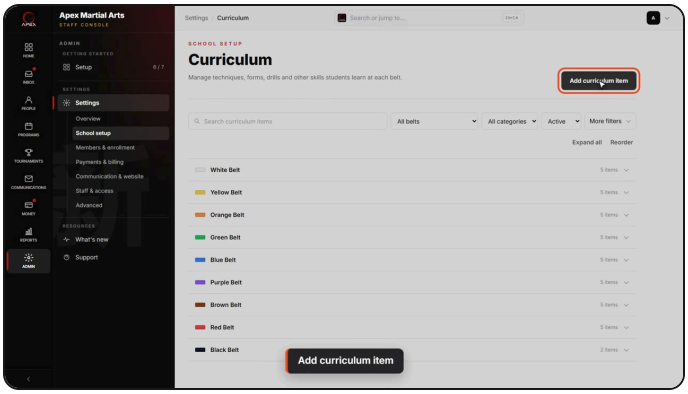

6 Reorder, then use the arrows

To set the teaching order, click Reorder, then use the arrows to move an item up or down within its belt. Every move saves on its own.

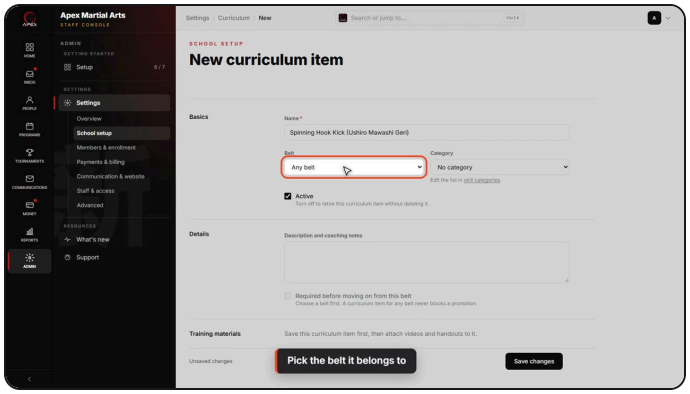

7 Done when you finish

Click Done when the order looks right, then Collapse all to tidy up.

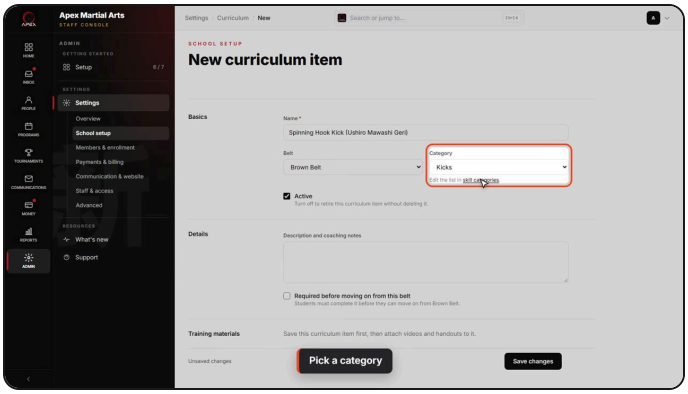

8 Add curriculum item

To add something new, click Add curriculum item. Let's add a spinning hook kick for brown belts.

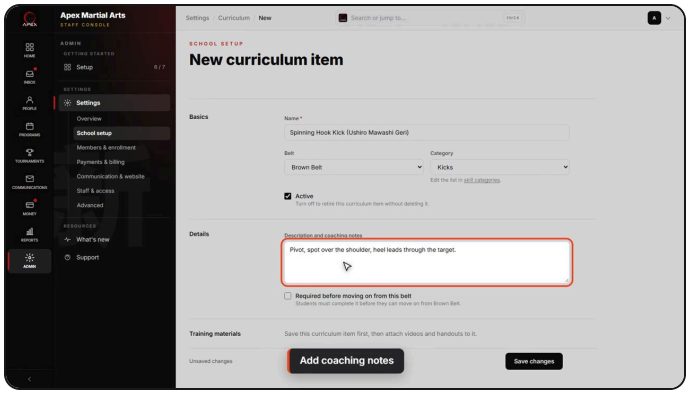

9 Pick the belt it belongs to

Choose the belt it belongs to. Leave it on Any belt if every student should work on it.

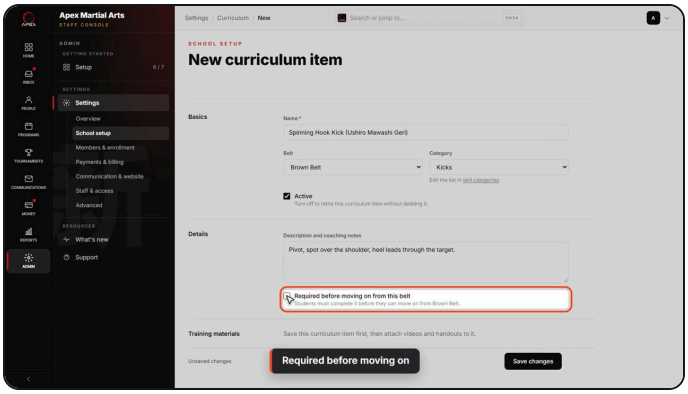

10 Pick a category

Pick a category from your list. The list itself is managed in Skill categories, linked right under the field.

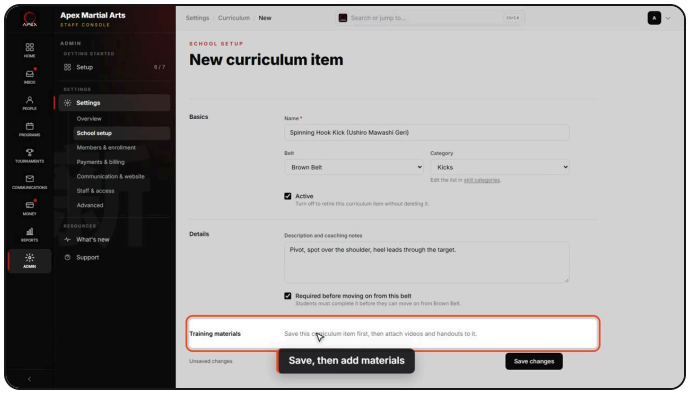

11 Add coaching notes

Add a description with the coaching notes instructors should see on the mat.

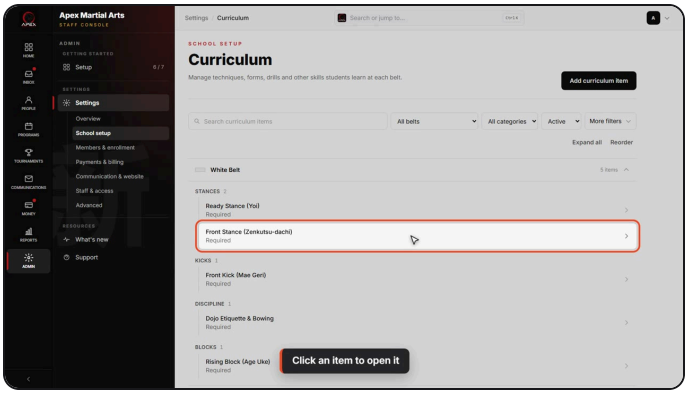

12 Required before moving on

Tick Required before moving on from this belt if a student must complete it before their next promotion. Items on Any belt can't be required, because they never block a promotion.

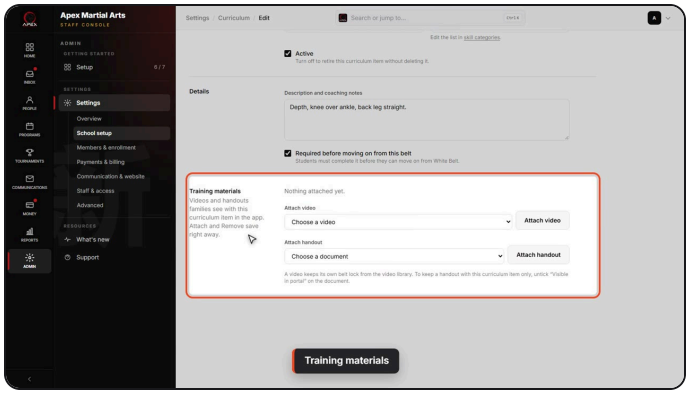

13 Save, then add materials

Click Save changes to add it to the list. Once it's saved, you can attach videos and handouts to it. We'll leave this one unsaved.

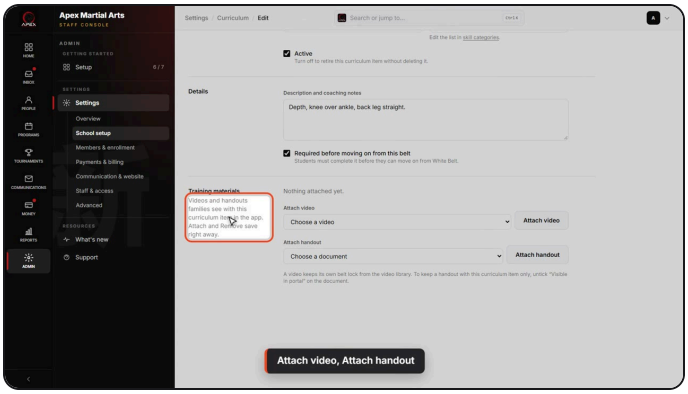

14 Click an item to open it

To add materials to an item you already have, click it in the list. Let's open Front Stance, at white belt.

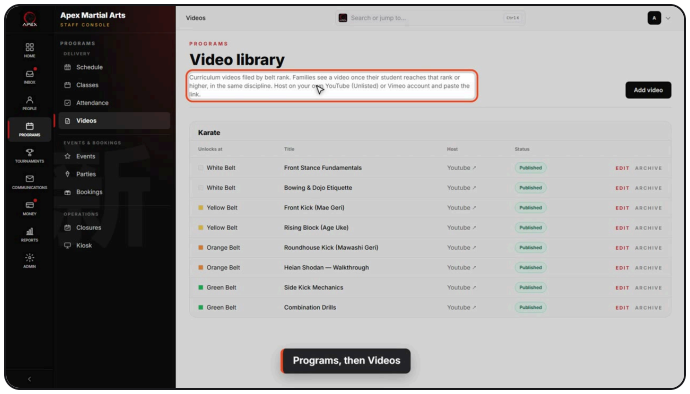

15 Training materials

Scroll down to Training materials. Videos and handouts you attach here show with this technique in the parent app, so students can practise at home.

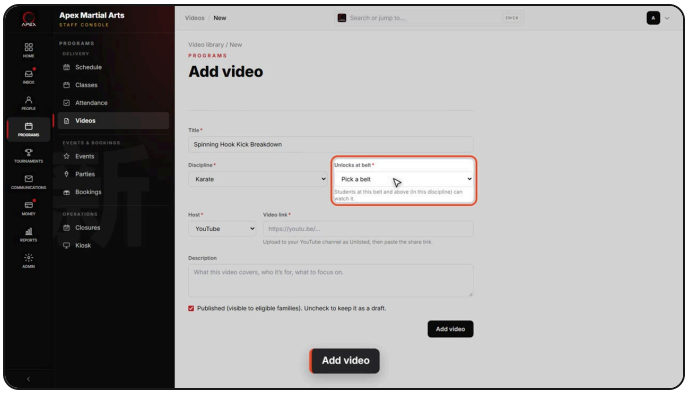

16 Attach video, Attach handout

Pick a video from your video library, then click Attach video. Attach handout works the same way for your documents. Both save right away.

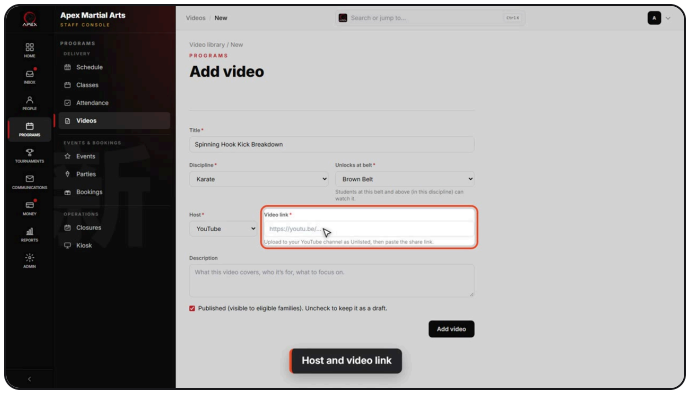

17 Programs, then Videos

The videos themselves live in the Video library, under Programs, then Videos. Each one unlocks when a student reaches its belt, or any belt above it.

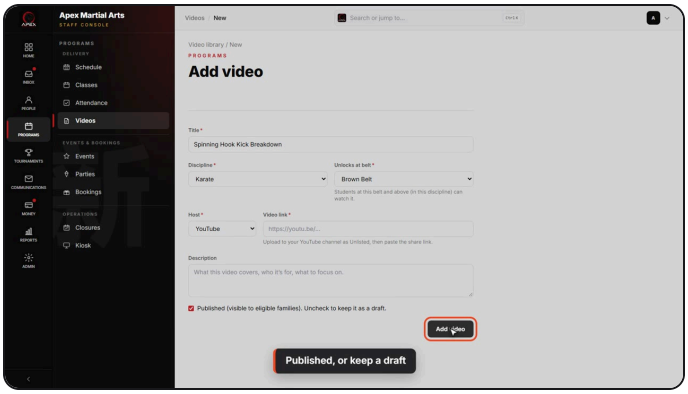

18 Add video

Click Add video to add one. Give it a title, then pick the belt it unlocks at. Students at that belt and above can watch it.

19 Host and video link

Choose where it is hosted, YouTube or Vimeo, and paste the link. Upload it to your own channel as Unlisted first.

20 Published, or keep a draft

Leave Published ticked so eligible families can watch it, or untick it to keep a draft. Then click Add video.

What happens next

1. **Next: Set your programs and prices**
   See what families pay for each program, how starter bundles and price changes work, and where family discounts and coupons live. Watch it at quickkicks.app/learn/schools/programs-and-pricing

Watch the video

Point your phone's camera at the code, or go to quickkicks.app/learn/schools/build-your-curriculum

Stuck?

In QuickKicks, open **Admin**, then **Support** (or **Help**, in the simpler menu), and send us a message. Or email **hello@quickkicks.app**.

Shown with a demo school. Your screens show your own school, and may look a little different.
